Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 32-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ivri et al-5586550 in view of Dowell et al-6037587.

Ivri discloses a device for depositing a liquid solution onto a vibrating plate with tapered apertures for forming droplets of a particular size for inhalation. However, the specifically claimed materials of the plate are not disclosed. Applicant has disclosed that gold/gold alloys were known to provide enhanced corrosion resistance. Dowell discloses that it was known to provide a gold plated container for drugs to prevent corrosion of the container or degradation of the drug. It would have been obvious to manufacture the plate of Ivri out of corrosion resistance materials to

prevent degradation of the drug applied to the plate. Therefore, it also would have been obvious to have used any of the claimed materials(palladium/palladium alloys) as these would simply have been obvious known alternatives to the gold as they were known to also exhibit enhanced corrosion resistance as evidenced by the known prior art disclosed by the applicant on page 12 of the present specification.

Conclusion
